

HOW TO APPLY AN MDSAVE PURCHASE TOWARDS YOUR DEDUCTIBLE

If you have a high deductible health plan, your MDsave purchase may count towards your deductible. Your insurance company will decide if your purchased procedure is eligible. To submit your MDsave purchase to be considered, you will need the following items:

From Your Provider

- Diagnosis Code (ICD-10 Code)
- Procedure Code (CPT Code)

You can request these at the time of service or contact your provider's office after your procedure.

From MDsave

- Itemized Statement of Charges

Contact an MDsave Care Specialist at 877-461-2491 or support@mdsave.com, and our team will send your itemized statement to you, usually within one business day.

NOTE: When you receive your itemized statement, you will see a bundling fee beneath your subtotal. Some insurance companies may not apply this amount to your deductible, even if they approve your procedures.

Once you have collected these forms, send them to your insurance company using the procedure outlined in your health plan.

Your insurance company may also ask you to submit a health insurance claim form, either online or on paper.
